

## **Global Markets Roundup**

Economic Analysis Division | September 16, 2024

#### The ECB cut rates as widely expected, while the Fed decision will take center stage this week

- Global equity markets rose significantly in the past week due to the prospect of aggressive Fed easing. The MSCI ACWI rose by +3.0% wow (+13.7% YtD) with Technology leading the increase.
- Government bond yields continued to retreat in anticipation of the Fed meeting on September 18<sup>th</sup>. The US Treasury 10-Year bond yield decreased by -6 bps wow to 3.65%, its lowest level since mid-2023, while the 10/2s curve remained upward slopping (+7 bps) following two years of inversion. The German 10-Year bond yield has stabilized at circa 2.15% post ECB (see below).
- US inflation decelerated by -0.4 pps to a 3½-year low of +2.5% yoy in August, while the FRB Cleveland's Inflation model points to a further deceleration in September (+2.3% yoy). With job creation slowing and the unemployment rate up by 0.4 pps in the past twelve months, the Fed is expected to cut interest rates on Wednesday, probably by 25 bps to 5.0% 5.25%. The FOMC's median interest rate projection (FFR) for 2024 and 2025 is expected to move significantly lower (current projections of 5.1% and 4.1%, respectively).
- Derivatives tied to the FFR reflect about a ½ likelihood that the Fed will reduce its policy rate by 50 bps this week. In addition, financial markets expectations, according to EUR overnight index swaps, price in cumulative cuts of -165 bps by end-2025 by the ECB. A large synchronous monetary easing has been built lately into asset pricing, with price to earnings ratios remaining above 21x in the US and real yields down by 50 basis points in the past two months (see graph page 3).
- The European Central Bank on September 12<sup>th</sup> cut the Deposit Facility Rate (DFR), the main rate via which the monetary policy stance is steered in the current environment of elevated liquidity (€3.1 trillion or 21% of euro area GDP), by -25 basis points to 3.50%, acknowledging the progress in inflation deceleration. As previously announced, the spread of DFR to the Main Refinancing Operations (MRO) rate was reduced to 15 bps (current MRO: 3.65%).
- The ECB continued to refrain from any explicit guidance regarding the next rate decisions, safeguarding the biggest possible flexibility. At the same time, the medium-term economic outlook was roughly unchanged, and the ECB continues to envisage headline inflation approaching the target of +2.0% in H2:2025.
- Short-term projections were revised lower for real GDP growth and higher for core CPI (see Economics). With services inflation remaining sticky (+4.2% yoy in August) and with headline inflation expected to temporarily increase to +2.6% on average in Q4:2024 from +2.3% in Q3:2024 due to base effects, the ECB could skip the October meeting, before lowering interest rates anew in December.
- The Bank of Japan officials have suggested that further rate hikes could be on the cards, albeit such a decision is not anticipated as soon as at the upcoming meeting (due on September 20<sup>th</sup>). Recall that the short-term policy interest rate was increased to +0.25% in late-July, from a range of 0% to +0.1%. The JPY/USD pair has broken through the JPY/USD140 threshold for the first time since mid-2023, with the Japanese currency up by +13% in the past two months.
- Finally, the Bank of England is also expected to stand pat on Thursday (Bank Rate: 5.0%).

## US headline CPI inflation decelerated significantly in August, albeit the core held its ground

- Headline US CPI inflation decelerated by -0.4 pps to a 3½-year low of +2.5% yoy in August (peak of +9.1% yoy in June 2022, the highest since November 1981), slightly below consensus estimates +2.6% yoy. It should be noted though, that the deceleration was in a big part due to base effects related to energy prices. In the event, energy prices (weight: 7%) had risen by +4.4% mom in seasonally adjusted "sa" terms in August 2023. Given also a -0.8% mom in August 2024, the annual growth decelerated by -5.0 pps to -4.0%. At the same time, Food prices (14% weight) recorded a modest +0.1% mom, with the annual pace of growth at +2.1% from +2.2% in July (peak of +11.4% in August 2022).
- Importantly, the annual growth of core CPI (79% weight) held steady at +3.2%, the lowest since April 2021 (peak of +6.6% yoy in September 2022). The annual pace was in line with consensus, although the monthly growth of +0.3% mom sa in August, moderately overshot expectations, July's pace as well as the 20-year average (all at +0.2% mom). Shelter prices (circa 1/3 of the headline CPI and circa 45% of the core index) which are predominantly determined by domestic economic developments, were the major contributor to core inflation in August. In the event, shelter prices were up by +0.5% mom in August, versus +0.4% in July as well as on average in the past 12 months (20-year average of +0.25%). Regarding the two major and relatively stickier shelter components, the index for the rent of primary residence came out at +0.4% mom from +0.5% mom in July (the annual growth was +5.0% from +5.1%) and the owners' equivalent rent of residences (i.e. the implicit rent that owner occupants would have to pay if they were renting their homes) at +0.5% mom from +0.4% mom in July (the annual growth was +5.4% from +5.3%). Excluding the dominant shelter component as well as the volatile one for used cars & trucks, core CPI rose more modestly, by +0.1% mom (+2.3% yoy) from +0.1% mom (+2.4% yoy) in July (12month average of +0.2% mom).
- Looking forward, the Federal Reserve Bank of Cleveland's Inflation Nowcasting model, points to a deceleration in September for both the headline CPI at +2.3% (monthly gains of +0.15%) and the core at +3.1% (monthly gains of +0.3%).

# The ECB maintained its medium-term forecasts for inflation, while slightly revising down the ones for real GDP

- Economic data in recent months have turned out softer than envisaged at the time of June's quarterly ECB staff's estimates, resulting in a modest downward revision for real GDP projections. In the event, real GDP rose by +0.2% gog in Q2:2024 versus ECB's estimates in June for +0.4% qoq. In addition, data so far at hand, suggest a high probability of the previous projection for +0.4% gog in the current quarter, not being reached. As a result, the estimate for real GDP growth in 2024, was revised down by -0.1 pp to +0.8%, after +0.5% in 2023. Note that ECB's projections were finalized prior to the GDP growth outcome for Q2:2024 being revised down by -0.1 pp to +0.2% qoq. For 2025 & 2026, ECB's forecasts were also revised down slightly by -0.1 pp, to +1.3% & +1.5%, respectively. The anticipated improvement is mainly linked to stronger envisaged private consumption in view of rising real incomes (especially in 2024, when growth of real disposable income is foreseen at +2.8% yoy from +1.1% yoy in 2023).
- Recent labor market data outcomes have turned out broadly as previously expected and as a result the path for the unemployment rate (record low of 6.4% in July 2024) was roughly unrevised. In the

- event, the projections stand at 6.5% throughout the projection horizon (average of 6.5% also in 2023).
- The inflation outlook was roughly stable. In the short-term, the downward effect from lower than previously expected readings for energy prices recently, was offset by elevated services inflation (+4.2% yoy in August) demonstrating somewhat more persistence than assumed in June. In all, headline inflation projections were stable at +2.5% on average in 2024, +2.2% in 2025 and +1.9% in 2026 (+5.4% in 2023). On core CPI, following an outcome of +4.9% in 2023 (on average), the projection for core CPI came out at +2.9% in 2024 (+0.1 pp versus June's projections), +2.3% in 2025 (+0.1 pp versus the previous estimates) and +2.0% (unrevised) for 2026.
- The changes in technical assumptions had mixed repercussions for the inflation outlook. In the event, oil prices are assumed to average €83.2/barrel in 2024 instead of €83.8/barrel in June's projections, €76.1/barrel in 2025 instead of €78.0/barrel and €73.2/barrel in 2026 instead of €74.5/barrel, down by -1.6%, on average, for the period 2024-2026 compared with the same period in June's projections. The assumptions for natural gas prices were revised up (by +15.2% cumulatively) following price developments in recent months, to an average of €34/MWh in 2024, €41/MWh in 2025 and €35/MWh in 2026 instead of €31/MWh, €35/MWh and €30/MWh, respectively. Finally, a somewhat stronger euro exchange rate is assumed, \$1.10 against the US Dollar on average in the projection period, instead of \$1.08.

# UK real GDP growth entered Q3:2024 flat, below expectations

According to the monthly estimate from the UK Office for National Statistics, real GDP was roughly unchanged for a 2<sup>nd</sup> consecutive month in July, versus consensus estimates for +0.2% mom (+1.2% yoy in July from +0.7% mom in June). A modest growth of +0.1% mom for the dominant services sector (79% of GDP), offset a -0.8% mom for production output (in turn due to a -1.0% mom for the manufacturing industry) and a -0.4% mom for construction. Recall that real GDP posted strong growth in recent quarters, +0.6% gog (+0.9% yoy) in Q2:2024 from +0.7% gog (+0.3% yoy) in Q1:2024, following a roughly stagnant GDP since early-2022 (the Q4:2023 level stood -0.1% below the respective one in Q1:2022). On the momentum, according to the UK National Institute of Economic and Social Research, real GDP is estimated to have been stagnant also in August, followed by +0.1% mom in September. Such performances would lead to a rise of +0.2% qoq (+1.2% yoy) overall in Q3:2024. Note that the latest (August 1st) estimates from the Bank of England called for +0.7% gog in Q2:2024 and +0.4% gog in Q3:2024.

#### China's external trade data were mixed in August

• The annual pace of growth of exports accelerated in August, contrary to the respective trend for imports. Specifically, exports - in USD terms – came out at +8.7% yoy from +7.0% in July, above consensus for +6.5% yoy. At the same time, the annual growth of total imports was +0.5% yoy from +7.2% yoy, versus expectations for +2.0% yoy. Regarding the composition of external trade flows in terms of directions, exports to the US rose by +4.9% yoy in August (imports from the US: +12.2% yoy), to the European Union (EU) by +13.4% yoy (imports from the EU: -5.3% yoy) and to the Association of Southeast Asian Nations (ASEAN) by +9.0% yoy (imports from ASEAN: +5.0% yoy).

#### **Equities**

 Global equity markets rose significantly in the past week (MSCI ACWI: +3.0% wow). The S&P500 increased by +4.0% wow (+18% ytd), led by Information Technology (+7.3% wow), as Nvidia recovered a big part of its recent losses (+15.8% in the past week, following a -19.9% since August 27th). Meanwhile, the equity volatility index (VIX index) remained somewhat elevated, at 18% in the past week (19% on average since late-July versus 14% on average in the first seven months of 2024). On the other side of the Atlantic, the EuroStoxx increased by +2.1% wow (+6.0% ytd). Banks recorded a +1.6% on Thursday (+2.4% overall in the past week), following an announcement by UniCredit (+1.9% wow) that it acquired a 9% stake of Commerzbank (+23.0% wow) and that it plans to initiate talks over a potential takeover. The announcement revived expectations that a levelling up of mergers & acquisitions in the European banking sector could be on the cards (EuroStoxx Banks: +20.2% ytd). The pan-European Stoxx600 was up by +1.9% on a weekly basis (+17.9% ytd). Finally, Chinese equities continued to underperform in the past week, with the CSI300 at -2.2% wow (-7.9% ytd) and the MSCI China at -0.4% wow (-1.1% ytd). On Saturday September 14th, August's main monthly indicators of economic activity (industrial, production, retail sales, fixed assets investment), came out below consensus estimates suggesting that the economy remains on a weak footing.

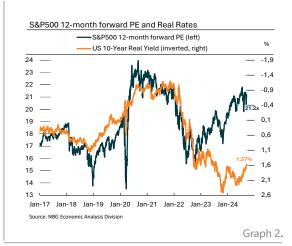

#### **Fixed Income**

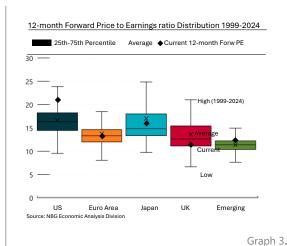

. Government bond yields were little changed in the past week, ahead of the Federal Reserve's meeting and with the ECB's decisions being in line with expectations. Specifically, the US Treasury 10-year bond yield decreased by -6 bps wow to 3.65%, reaching 3.64% intra-week, the lowest since early-June 2023. Its 2-year peer fell by -7 bps wow to a 2-year low of 3.58%. As a result, the yield curve has dis-inverted in view of investors' expectations that an expeditious rate cut cycle by the Federal Reserve is set to start imminently. In Germany, the 10-year Bund yield was down by -2 bps on a weekly basis to 2.15%. Bond spreads were slightly down in Italy, by -2 bps wow to 136 bps in the 10-year tenor against the Bund. Note that strong demand was recorded in the past week for an €8 bn. 30year Italian government bond, with offers amounting to €130 bn. The respective spread in Greece was down by -8 bps to 99 bps. On Friday September 13th, Moody's maintained the rating at Ba1, upgrading however the outlook to positive due to: i) strong performance of the banking sector and; ii) strong fiscal performance, with the primary surplus being anticipated at 2.2% of GDP on average in 2024-2026 and the public debt to steadily fall at 150% of GDP in 2025 and below 140% in 2027. S&P Global will follow on October 18th and Fitch on November 22<sup>nd</sup>. Corporate bond spreads were broadly unchanged in the past week, both in the high yield spectrum (USD: -2 bps wow to 337 bps | EUR: stable at 359 bps) and the investment grade spectrum (USD: stable wow 99 bps | EUR: +2 bps to 118 bps).

#### **FX and Commodities**

• In foreign exchange markets, the Japanese yen appreciated further in the past week, as expectations that the Bank of Japan (BoJ) will increase policy rates remains in place. The Yen rose by +1.2% wow against the US dollar to ¥140.7 and by +1.4% against the euro to ¥156.0. Meanwhile, the euro was down by -0.3% wow against the US Dollar overall in the past week (\$1.109), despite an uptick following the ECB meeting (+0.3% on Thursday). In commodities, oil prices were volatile, albeit ending with gains on a weekly basis (Brent: +0.8% wow to \$71.6 | WTI: +1.5% wow to \$69.6/barrel). Weighing on prices, OPEC modestly revised down its projections for demand growth in 2024, by -80 thousand barrels/day compared with its estimates a month ago, pointing to +2.0 million barrels/day to 104.2 mn brl/day. Finally, gold prices reached a fresh record high in view of investors' expectations that an expeditious rate cut cycle by the Federal Reserve is set to commence imminently, +2.4% wow to \$2578/ounce (+25.0% ytd).

Quote of the week: "And here we see one particular indicator, the domestic indicator, which is abating a little bit because it moved from 4.5% to 4.4% between June and July, and it is not satisfactory. It is resistant. It is persistent.", President of the European Central Bank, Cristine Lagarde, September 12<sup>th</sup> 2024

ŭ	Broadly Flat USD against G10 FX	Range-bound with upside risks against the USD	Stronger IDV	Broadly stable GBP

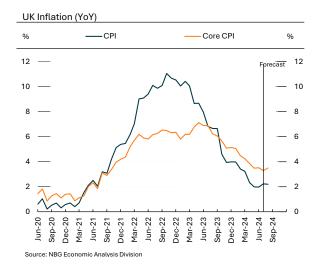

#### **Economic Calendar**

In the **US**, all eyes on the Federal Reserve meeting. Apart from policy decisions, the forward guidance in the statement alongside Chair's comments in the Press conference, as well as the quarterly economic projections and the FOMC members' assumptions for the appropriate path of monetary policy, will be closely monitored. Meanwhile, a plethora of economic data will be released (e.g. retail sales).

In the **UK**, the Bank of England is expected to stand pat, while August's CPI is due.

In **Japan**, the Bank of Japan is also expected to keep rates unchanged.

Finally, in **China**, the main monthly economic indicators for August are due.

#### **DISCLOSURES:**

This report has been produced by the Economic Research Division of the National Bank of Greece, which is regulated by the Bank of Greece, and is provided solely as a sheer reference for the information of experienced and sophisticated investors who are expected and considered to be fully able to make their own investment decisions without reliance on its contents, i.e. only after effecting their own independent enquiry from sources of the investors' sole choice. The information contained in this report does not constitute the provision of investment advice and under no circumstances is it to be used or considered as an offer or an invitation to buy or sell or a solicitation of an offer or invitation to buy or sell or enter into any agreement with respect to any security, product, service or investment. No information or opinion contained in this report shall constitute any representation or warranty as to future performance of any financial instrument, credit, currency rate or other market or economic measure. Past performance is not necessarily a reliable guide to future performance. National Bank of Greece and/or its affiliates shall not be liable in any matter whatsoever for any consequences (including but not limited to any direct, indirect or consequential losses, loss of profits and damages) of any reliance on or usage of this report and accepts no legal responsibility to any investor who directly or indirectly receives this report. The final investment decision must be made by the investor and the responsibility for the investment must be taken by the investor.

Any data provided in this report has been obtained from sources believed to be reliable but has not been independently verified. Because of the possibility of error on the part of such sources, National Bank of Greece does not guarantee the accuracy, timeliness or usefulness of any information. Information and opinions contained in this report are subject to change without notice and there is no obligation to update the information and opinions contained in this report. The National Bank of Greece and its affiliate companies, its representatives, its managers and/or its personnel or other persons related to it, accept no responsibility, or liability as to the accuracy, or completeness of the information contained in this report, or for any loss in general arising from any use of this report including investment decisions based on this report. This report does not constitute investment research or a research recommendation and as such it has not been prepared in accordance with legal requirements designed to promote investment research independence. This report does not purport to contain all the information that a prospective investor may require. Recipients of this report should independently evaluate particular information and opinions and seek the advice of their own professional and financial advisers in relation to any investment, financial, legal, business, tax, accounting or regulatory issues before making any investment or entering into any transaction in relation to information and opinions discussed herein.

National Bank of Greece has prepared and published this report wholly independently of any of its affiliates and thus any commitments, views, outlook, ratings or target prices expressed in these reports may differ substantially from any similar reports issued by affiliates which may be based upon different sources and methodologies.

This report is not directed to, or intended for distribution to use or use by, any person or entity that is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to any law, regulation or rule.

This report is protected under intellectual property laws and may not be altered, reproduced or redistributed, or passed on directly or indirectly, to any other party, in whole or in part, without the prior written consent of National Bank of Greece.

#### **ANALYST CERTIFICATION:**

The research analyst denoted by an "AC" on page 1 holds the certificate (type  $\Delta$ ) of the Hellenic Capital Market Commission/Bank of Greece which allows her/him to conduct market analysis and reporting and hereby certifies that all of the views expressed in this report accurately reflect his or her personal views solely, about any and all of the subject issues. Further, each of these individuals also certifies that no part of any of the report analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed in this report. Also, all opinions and estimates are subject to change without notice and there is no obligation for update.
